

Cedar Point Global

Tech Now

Tech Now

The rate of change in technology today is faster than ever, and is not about to slow down. Technological changes are impacting businesses and processes in ways that are unprecedented. Businesses have to not only consider how current changes impact them, but also think of how future changes and possible future changes will affect business, then align accordingly. This agility is critical for survival in today's world and those that lag behind lose market share and, and risk closure.

Workshop objectives

- Enable business leaders to re-imagine their businesses in the wake of technological changes (current and future changes)
- Build proactive and forward thinkers

Workshop outcomes

Agile thinkers with actionable plans for sustainability of their businesses

Outline

Experts will lead various sessions and work with the teams to come up with realistic and achievable action plans which participants can easily implement in their businesses.

Topic

- Current technological changes affecting the business landscape
- Responding to current issues
- Future and possible technological advancement
- Proactively preparing for future changes

Target audience

Business Leaders

Cedar Point: Inspiring peak performance
